

Accufy update instructions from v1.5 – v1.6

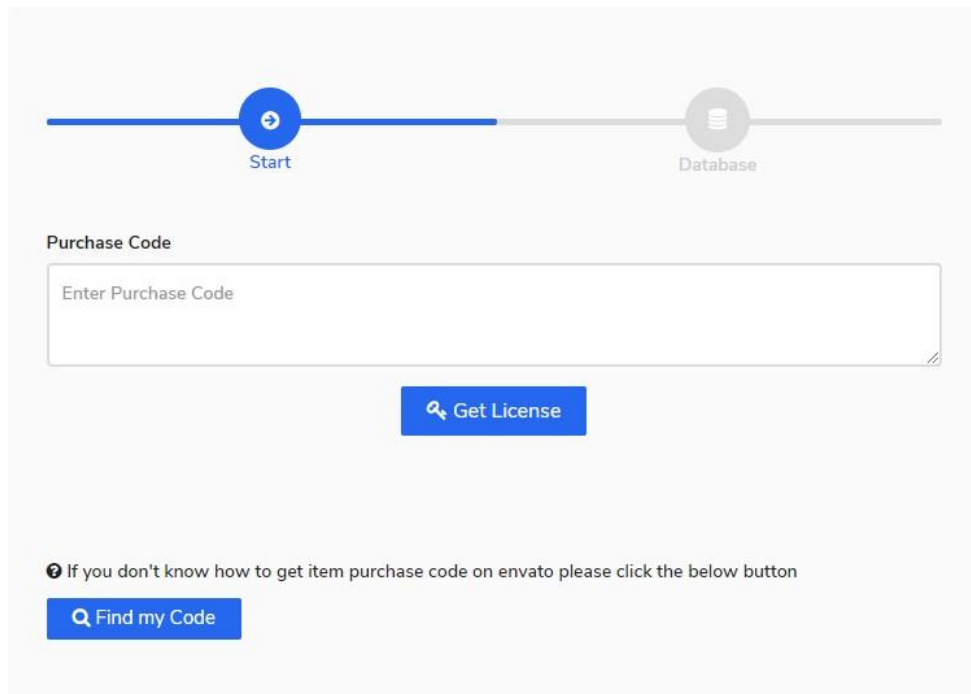

Step 1: Backup ! you must backup your all files & database before update.

Step 2: Download the latest Accufy_1.6 script file and extract it on your pc. Open **updates > update_v1.5_v1.6 > “uploads”** folder there you will see **2 zip files** in this folder and you need to upload those files in your server please follow the below directions carefully.

- **application.zip** > upload path: Goto your **project root folder > application** > upload this zip file and extract it inside this folder.
- **assets.zip** > upload path: Goto your **project root folder > assets** > upload this zip file and extract it inside this folder.

Step 3: Upload “updates” folder in your project root folder

Step 4 Open a browser and write url like this: www.yourdomain.com/updates/update_v1.5_v1.6 you will see a page like below here enter your item purchase code for update this script.

The screenshot displays a web interface for updating Accufy. At the top, a horizontal progress bar features two circular icons: a blue one with a right-pointing arrow labeled 'Start', and a grey one with a database icon labeled 'Database'. Below this, the 'Purchase Code' section contains a text input field with the placeholder 'Enter Purchase Code'. A blue button with a magnifying glass icon and the text 'Get License' is positioned below the input field. At the bottom, a small informational note states: 'If you don't know how to get item purchase code on envato please click the below button'. Below this note is another blue button with a magnifying glass icon and the text 'Find my Code'.

Step 5: Here provide your current database credentials and wait few seconds for update your scripts.
